Hellenic American University does not discriminate on the basis of race, color, national and ethnic origin, gender, sexual orientation, age, religion, physical disability or veteran status in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic or other school-administered programs.
What makes us unique

As a student in the Hellenic American University Bachelor of Psychology program, you will acquire fundamental knowledge of psychology as a social and natural science through an engaging and integrated combination of theory, experimental application and practice. You will work closely with psychology faculty members in small classes, field placements and research projects to improve your understanding of mental and behavioral processes. Working with your mentor you will also be able to tailor your program to pursue your own interests in the field, for example, in clinical or industrial psychology, and develop competencies that are important for a future professional in human services or related fields or for further studies at the graduate level.

Our strengths:

- Extensive integration of psychological theory and research methods.
- A wide spectrum of electives, including Clinical Psychology, Child Psychotherapy, Educational Psychology, Psychology of Addictions, Play Therapy and Music Therapy.
- An emphasis on the cognitive behavioral perspective, together with the exploration of other approaches to psychotherapy and counseling.
- Career counseling and opportunities for networking through our Career Development Office during and after your studies.
- Active outreach community programs and events with the participation of mental health organizations and our College Counseling Center.
- A flexible program that includes the opportunity to do some of your courses online.
- Close faculty mentorship.
- A student- and community-oriented department that is an active member of an international network of mental health institutions and centers.

We offer you opportunities for active learning and research through:

- Participation in ongoing faculty-student research projects in clinical, health, education and community psychology.
- A supervised senior thesis as part of a Capstone research project.
- Support for pursuing your own research interests and opportunities to present your findings at the University Annual Student Research Conference.
- Internship experience in applied settings, such as mental health clinics, social agencies, schools, businesses, and the College Counseling Center.

Be an active participant in your studies

Who will teach you

Our faculty members are devoted to student-centered teaching and engaged in research and developments in the field; many have extensive clinical experience locally and internationally.
